

STOP / GO LED Sign with Vehicle Smart Sensor

To detect moving vehicles and warn pedestrians of dangerous intersections. STOP/ GO Led Sign with Vehicle Smart Sensor are independent from each other, making it the "go-to" safety system for unconventional & blind corner intersections. GO signal is always on, STOP signal flashes when vehicle approaches intersection.

STOP (white text on red background), top part of the sign. GO (white text on green background), bottom part of the sign.

BENEFITS

STOP GO SAFETY SYSTEM: All in one safety system with the capability to add multiple sensors for unconventional intersections.

PROGRAMMABLE DETECTION FIELD : Easily programmed w/ included remote. Maximum detection range of 16' (5M).
